

Dear CCA students,

Summer is a fantastic time for new experiences and outdoor adventures. It can also be a time when math skills slip away into the corners of our brains.

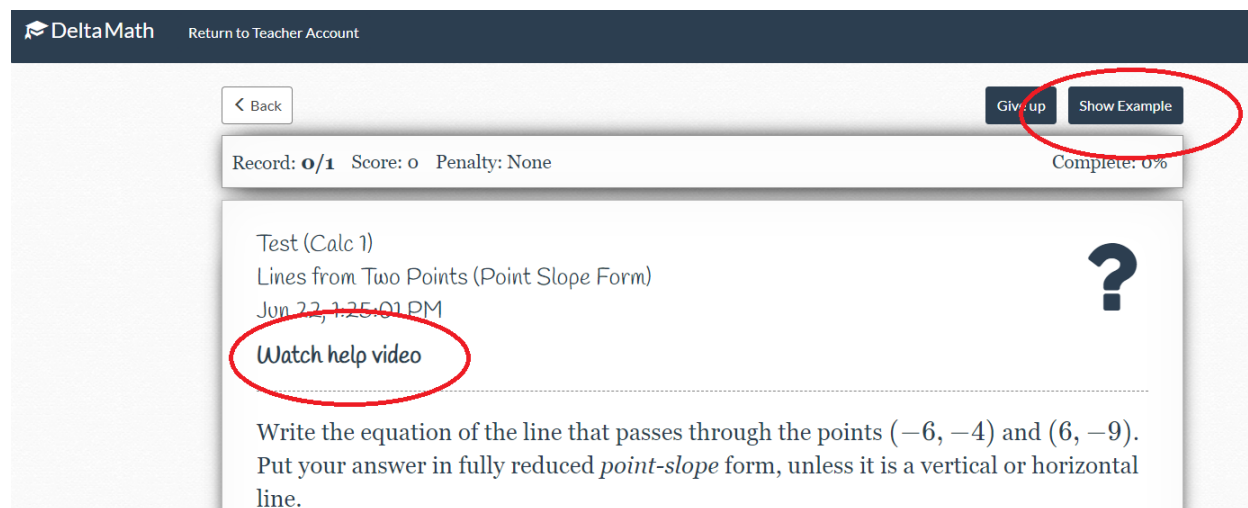

To help keep our skills fresh, we have provided you with some math review. There is a change this year from math packets in years past. The packet will be online, with due dates during the summer. **All students must complete the assigned work.**

To access the packet, you will need to create a free DeltaMath account. Go to deltamath.com, and create a student account.

Then use the Join Code on the next page to join your class and access the packet. The teacher's name on your class may not match your teacher for the fall, so don't be concerned if you see an unexpected name.

If you get confused by questions on the packet, there are help videos and examples so that you can learn or remember what you need to know. Have a happy summer!

Jeff Cagle
Math Department Chair
Chapelgate Christian Academy

Join Codes – When you sign up for DeltaMath, use this Join Code to join the class.
